

# Ideas

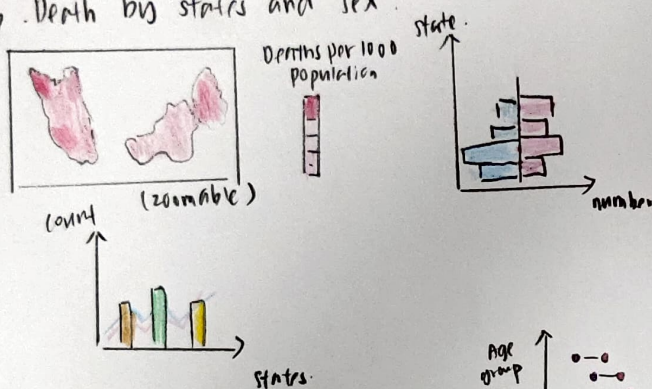

↳ clarify top 10 principal causes of death.

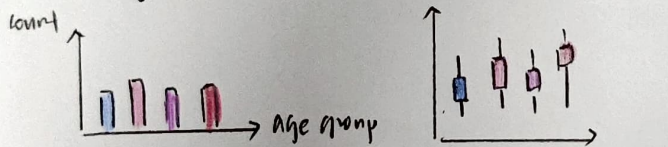

↳ Deaths by ethnic group and sex

↳ Death by states and sex

↳ Deaths by age group

↳ deaths is medically certified or non-medically certified (states)

## Combine & Refine

Combined with gridlines and ocean layers

# Filters

①

similar to radar chart, therefore remove duplicate circular chart.

②

③

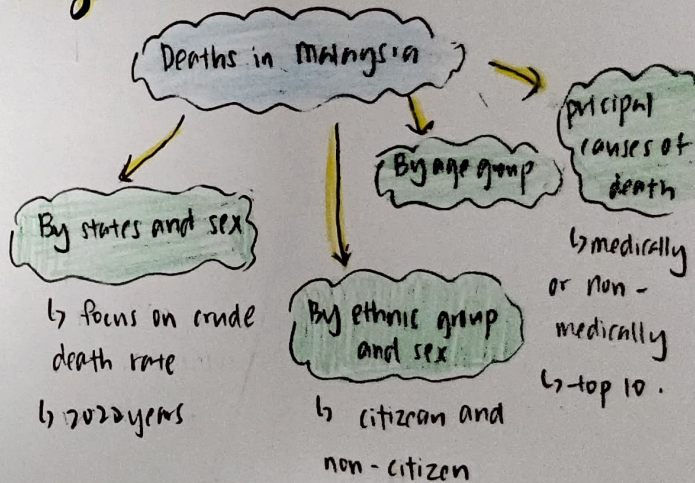

hard to observe the comparison of deaths of male and female clearly.

④

separate it by using choropleth map and diverging bar chart will more suitable.

## Categories

## Question

- ↳ is that using choropleth map will more suitable for this visualisation?
- ↳ is it using crude death rate instead of total deaths of each states will more accurate for map?
- ↳ ethnic group should more specific by differentiate Malay, Cina, India and others?

Author : Eunice Yn Pein

Date : 27/9/2024

Sheet : 1

Task : Planning visualisation 2.

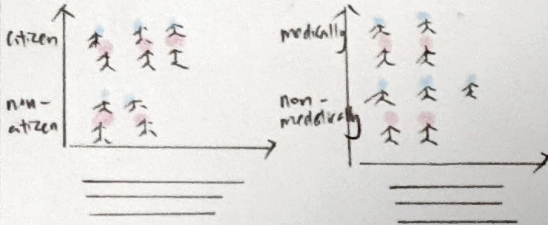

# Layout

Deaths per 1000 populations.

## Total Deaths and Crude Death Rate by States in Malaysia, 2022:

Title: Total Deaths and crude death rate by state in Malaysia, 2022.

Author: Eunice Yn Peral

Date: 27/9/2024

Sheet: 2

Task: Design an infographic poster.

## Operation

↳ have tooltip information while clicking the corresponding state on map.

click  
↓ showing

tooltip

state: Sarawak  
Total Deaths:  
Crude Death Rate.

↳ while clicking the corresponding state, it will highlight the female and male distribution of the specific state in diverging bar chart

## Focus

↳ main focus on the deaths in Malaysia by states, sex, ethnic group, age group and principal causes. (distribution by sex)

Map	
Title	
by sex	
# ethnic group	# medically?
# age group	# principal causes

## Discussion

### Advantages

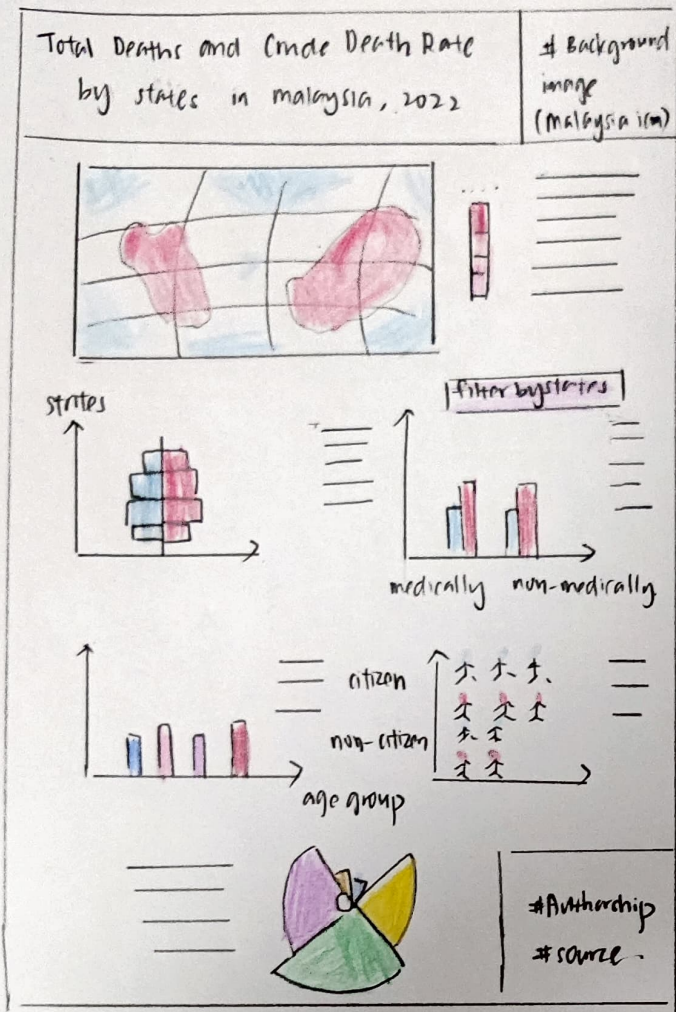

- ↳ well structured into clear sections
- ↳ easy for user to operate
- ↳ using isotype dot plot, more eye-catching

### Disadvantages

- ↳ chart not aligning
- ↳ title too big
- ↳ no centralise
- ↳ too many empty space

# Layout

## Focus

- ↳ no mainly focus.
- ↳ emphasis the deaths for each states in Malaysia (use different chart emphasis the male and female death's data).

# Title	# Background
# map	
# by sex, states	# by states, medically?
# age group	# ethnic group
# principal causes	# Authorship

Title: Total Deaths and Crude Death Rate by States in Malaysia, 2022

Author: Eunice Yu Pein

Date: 27/9/2024

Sheet: 3

Task: Scrollable Narrative Visualisation

## Operation

### ↳ filter by states

- ↳ when mouse detected this column, can choose to observe the data of specific state for medically or non-medically certificated deaths.

## Discussion

### Advantages:

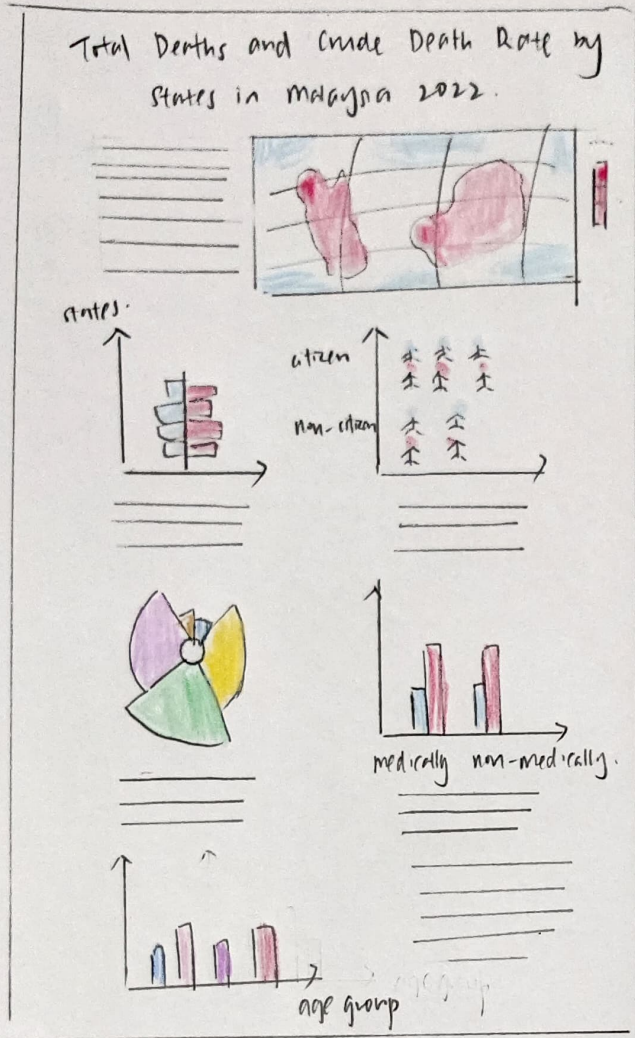

- ↳ easy to follow
- ↳ have user interaction (filtering)
- ↳ have Authorship, avoid copyright.

### Disadvantages

- ↳ title too left, may occupied too many space
- ↳ arrangement of description too messy.
- ↳ too many bar chart.

# Layout

Title: Total Deaths and Crude Death Rate by States in Malaysia, 2022

Author: Eunice Yu Peen.

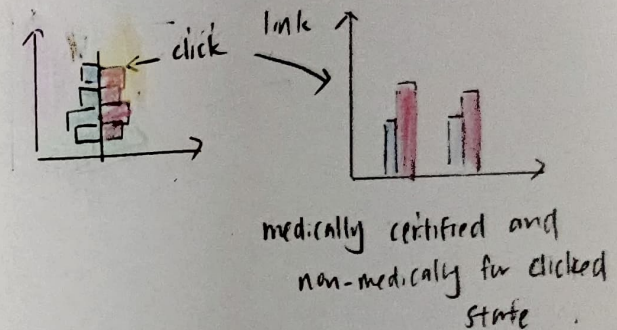

Date: 27/9/2024

Sheet: 4

Task: Scrollable Poster

## Operation

↳ When clicking the specific states, in the bar chart, it will link to the medically and non-medically chart

## Focus

- ↳ no mainly focus on what
- ↳ emphasis the deaths for each states in Malaysia.

Title	
map	
# By sex & States	# By ethnic group
# principal causes	# medically 2
# By age group	

## Discussion

### Advantages:

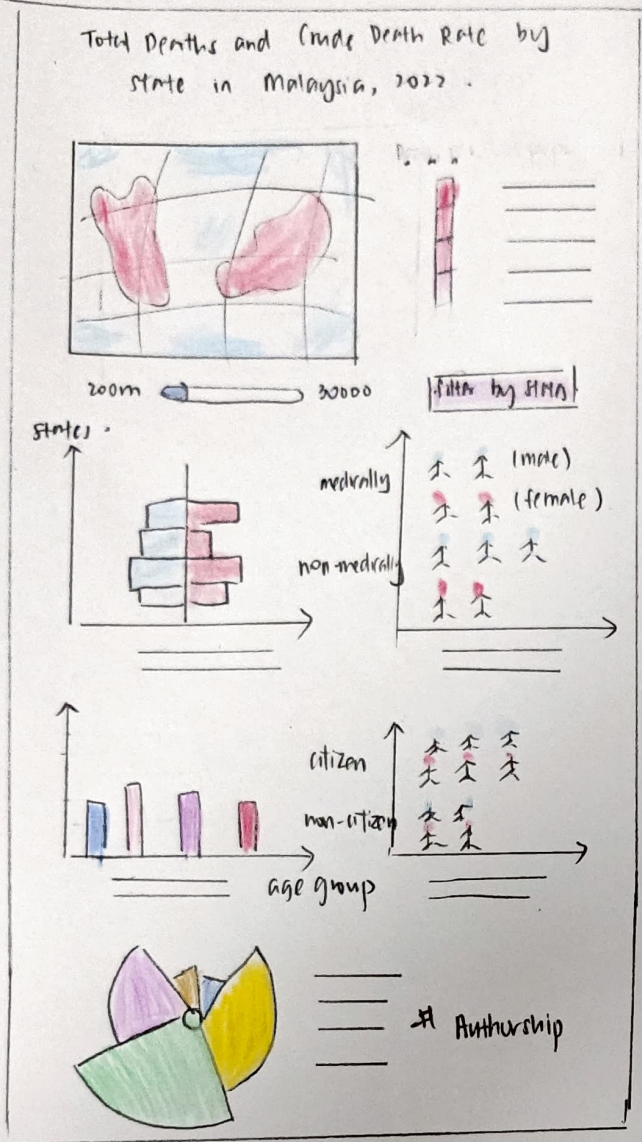

- ↳ well structured, scrollable, easier to read for user
- ↳ wider range of visualisation to be used

### Disadvantages

- ↳ too many bar chart
- ↳ information overload.
- ↳ arrangement of information and description confused

# Layout

## Focus

- ↳ Emphasis annotation to guide the user. (not death state)
- ↳ main focus story telling
- ↳ all graph and chart is important

Title: Total Deaths and Crude Death Rate by State in Malaysia, 2022

Author: Eunice Yu Perna

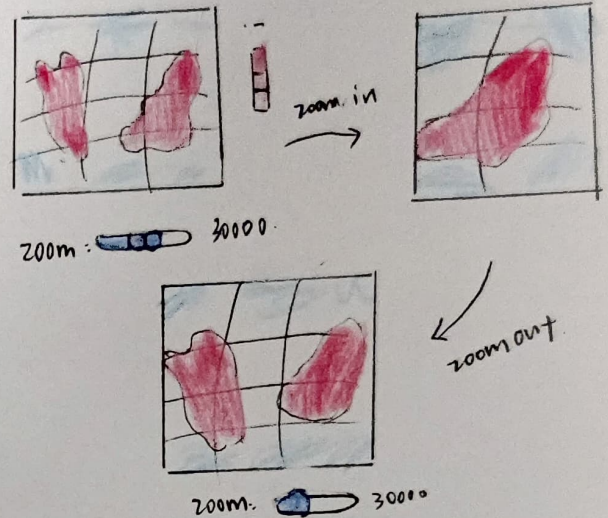

Date: 27/9/2024

Sheet: 5

Task: Design final layout.

## Operation

- ↳ Can zoom choropleth map with a time slider.

## Details

- ↳ Dependencies: Vega Lite, Git Hub, Visual Studio Code
- creating map and diagram using Vega-Lite
- make visualisation publicly accessible as a GitHub page

- ↳ Estimate time and effort:

- at least 3 days to build all map and diagrams & 3 days for final design
- 1 day for map
- 1 day for isotype dot plot
- 1 day for bar chart and radar chart
- 2 day for research and organise data use for Vega Lite.

- ↳ Specific requirement: ensure only scroll up and down, avoid left and right, make sure visualisation is clear and readability
